Application No.

Applicant(s)

J, YANG ET AL

Group Art Unit 28/1

-The MAILING DATE of this communication appears on the cover sheet beneath the correspondence address-

Period for Reply

ONE A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, such period shall, by default, expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely, may reduce any earned patent

Status	
☐ Responsive to communication(s) filed on	
☐ This action is FINAL.	
 Since this application is in condition for allowance except for formal matter accordance with the practice under Ex parte Quayle, 1935 C.D. 1 1; 453 O 	ers, prosecution as to the merits is closed in e.G. 213.
Disposition of Claims	
☑ Claim(s) / - 20	is/are pending in the application.
Of the above claim(s)	is/are withdrawn from consideration.
□ Claim(s)	is/are allowed.
□ Claim(s)	is/are rejected.
□ Claim(s)	is/are objected to.
☑ Claim(s) / - 20	are subject to restriction or election

Art Unit 2811

Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claim 20, drawn to a semiconductor device, classified in class 257, subclass 324.

II. Claims 1-19, drawn to a process for making semiconductor devices, classified in

class 438, subclass 514.

The inventions are distinct, each from the other because:

Inventions II and I are related as process of making and product made. The inventions are

distinct if either or both of the following can be shown: (1) that the process as claimed can be used to

make other and materially different product or (2) that the product as claimed can be made by

another and materially different process (MPEP 806.05(f)). In the instant case unpatentability of the

group I invention would not necessarily imply unpatentability of the group II invention, since the

device of the group I invention could be made by processes materially different than those/that of the

group II invention, for example, the "doped" regions could be formed before rather than after the

"charge trapping" layer is formed.

Because these inventions are distinct for the reasons given above and, as shown by the above

different classifications, the fields of search are not co-extensive and separate examination would be

required, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an

election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
